EDC 2022 VIRTUAL

17TH EDUCATION AND DEVELOPMENT CONFERENCE

5TH - 7TH OF MARCH 2022

VIRTUAL CONFERENCE

REINFORCING HUMANITY IN EDUCATION

The theme of this year's conference is inspired by diverse needs of 21st century learners. Are we moving towards a new paradigm of personalized education? Who are the 21st century learners and what are their needs? What are the needs of the society and what are desired learning outcomes? How can traditional educational systems adapt to this fast changing world and support needs of the society? And how does technology fit in?

Global experts will help us find answers to these and many more questions at the EDC2022.

Welcome to the 17th Education and Development Conference [EDC2022]

Importance of Assessment and Feedbacking 1 day ago

View 5 messages

Participating in the 17th Education and Development Conference (EDC2022) was an incredible learning experience. I have observed a variety of activities taking place on the Whova Platform, including educational lectures, engaging conversations, and the exchange of multiple messages with other participants.

The Conference took place in the London time zone (from 11 a.m. to 5:30 p.m. daily), but the complete content will be available and accessible on the platform at any time after the presentations have taken place, in order to provide equal opportunities for the worldwide EDC community to engage in the discussions taking place.

COVID and Typhoon Rai

Mar 5, 2022 9:07 PM

Louisa Patat

I created topic: COVID and Typhoon Rai.

Prof. Aileen S. Taisano

If you can come across the paper of Subert's talk... maybe that is a success

Thank you @Prof. Aileen for the suggestion

Prof. Aileen S. Taisano

he is an absolute best power presentation last year... best if we touching in the context of education and government helping each other

@Prof. Aileen, would you mind if I ask for the link of the paper, very much interested in reading it

Klem Morris Ababon, LPT

Hello @Louisa Patat, here in Quipper, our clients also experienced such matter that but we supported them by creating solutions tailored to their needs. I Even as an LMS provider, we also consider learners without the luxury of internet connectivity, so we developed a mobile application which content can be cached and they can browse lessons offline :)

@Klem Morris Ababon, LPT, I think this is not feasible as of the moment since we are totally unreliable and data connection is not possible.

I see @Louisa Patat, I would also like to share that our other schools also printed out ready-made content and downloadable slides from our platform and make those as their modules :)

Prof. Aileen S. Taisano

@Louisa, I guess schools is here, will come back to you later

Mar 5, 2022 9:07 PM

Victor Anagilano

Hello @Louisa Patat! There we still embrace and embrace technology. Institutions should invest in a good LMS provider and maybe a cheap but good quality tablet with mobile internet for students, just being the tablet to students and not just to them. The tablet may have the tablet or lessons that can be accessed offline. They may sound ridiculously costly but there it would be worth it and once Philippines is hit by typhoons or other, having this as a backup plan is a good for learning continuity.

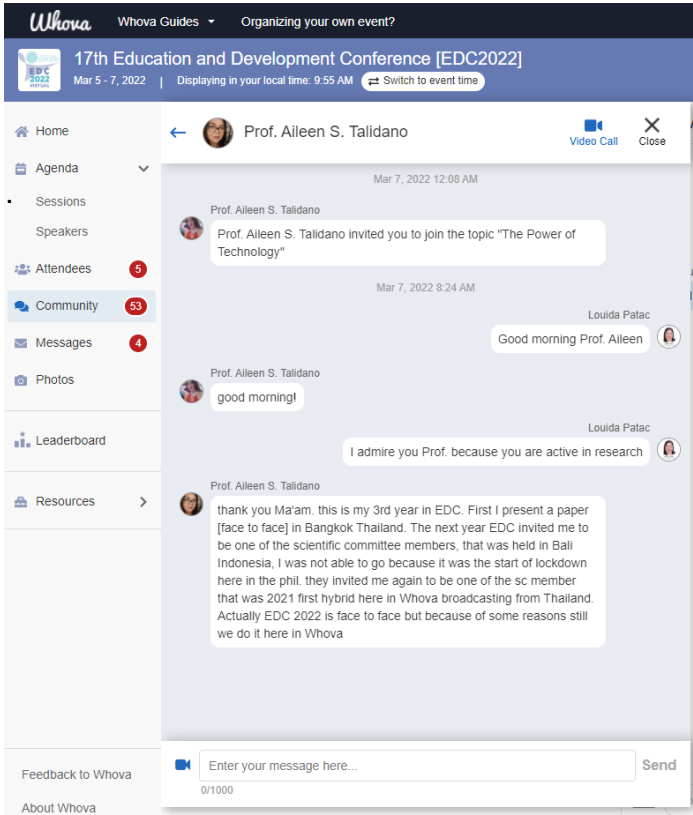

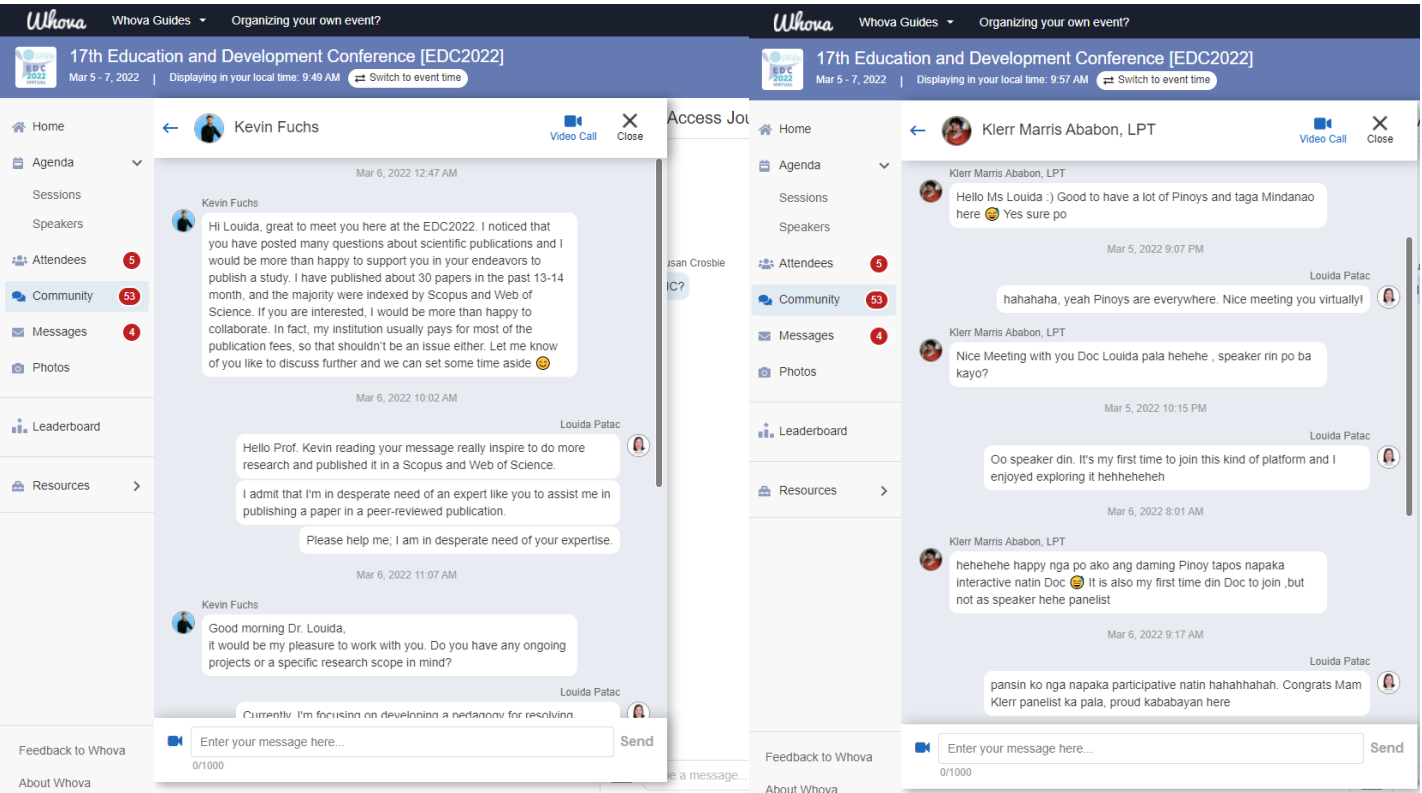

Thank you Ms. @Louisa Patat for your suggestions and we will consider it

This conference also provided me with the opportunity to network with and exchange ideas with research professionals from across the world via the Whova Platform.

In addition, I am pleased to see a large number of Filipinos in attendance at the conference.
